I am a well enthusiastic detailed oriented front-end web developer seeking an opportunity to prove my worth and skills in coding and problem handling. I am well aware of upcoming web technologies and have enough ability to cope with it.

PROJECTS

- **MyCarpentry** — A responsive site based on tool manufacturer companies.
  - o Developed two different UI based on user and admin. And implemented CRUD Operations based on local user and admin.
  - o Implemented Google Firebase Authentication and JWT authorization based on logged in user.
  - o Implemented payment gateway with React Stripe for a user so that user can pay for the item he/she chooses.

  TOOLS: Functionalized the project with the help of React, React Router, DaisyUI, Tailwind CSS, Google Firebase, Axios, React Query, React Stripe etc.

  Client Side | Server Side | Live Site.

- **Pixieco**— A responsive site based on individual service provider.
  - o Implemented user authentication with the help of Google Firebase
  - o JWT implementation based on login and sign up.
  - o Enhanced this sites performance with simplification of the codes.

  TOOLS: Created this site with React JS, React Bootstrap, Google Firebase, React Icons etc.

  GitHub | Live Site.

- **Laptop Mania**— A responsive site for managing inventories of a specific item.
  - o Authenticated this site with Google Firebase (React Firebase Hook) and Prevented some features for unauthorized login.
  - o A token will be initialized with each login and Secured the backend API with JWT.
  - o User can control increment and decrement of inventory items and backed-up the changed data to MongoDB server.

  TOOLS: Finalized the site with correct implementation of React JS, React bootstrap, React Router, MongoDB, Express JS, Google Firebase and some more React Component Libraries.

  Client Side | Server Side | Live Site.

SKILLS

Comfortable With,

Frontend: HTML, HTML5, CSS, CSS3, CSS Frameworks (e.g. Bootstrap, Tailwind CSS), JavaScript, ES6, React, React Component-based Libraries (e.g. React Router, React Firebase Hook, React Form Hook, AOS Animation, React Bootstrap, DaisyUI, Flowbite, React Query, Axios, Google Firebase etc.).

Backend: MongoDB, Express JS., CRUD Operations.

Familiar With,

Frontend: React Native, Typescript, Express JS.

Backend: JWT, Node JS.

Familiar Tools: VS Code, Sublime Text, Git, GitHub, Photoshop, Adobe Lightroom.

COURSES/ACHIVEMENT

Successfully completed a full web development course and attended some bootcamps that can be helpful in future projects.

EDUCATIONAL QUALIFICATION

Changzhou University (2019 - Present) – Bachelor of Science in Chemical Engineering and Technology.

LANGUAGE PROFICIENCY

- Bengali – Native.
- English – Comfortable.
- Chinese Simplified – Elementary.
- Hindi – Comfortable.
